📍 Hyderabad

PROJECTS

Real-Time Driver Drowsiness Detection System

- Built a real-time driver monitoring system using Python, OpenCV, and NumPy for real-time data processing and video frame analysis.
- Built a real-time driver drowsiness detection system using OpenCV.
- Detected facial features and eye regions using Haar cascade classifiers.
- Implemented Eye Aspect Ratio (EAR) to identify drowsiness conditions.
- Integrated live webcam feed with alert system for real-time monitoring.

Telecom Customer Churn Prediction & Analytics

- Developed a churn prediction model using Logistic Regression and Random Forest.
- Performed data preprocessing, feature encoding, and handled class imbalance.
- Achieved approximately 85% accuracy and identified key factors influencing customer churn.
- Built Power BI dashboard to visualize churn trends and customer insights.

GenAI Document Question-Answering System

- Built a GenAI-powered document Q&A system using LangChain and OpenAI API.
- Implemented document loading, text chunking, and semantic search using FAISS.
- Generated embeddings and enabled context-aware responses using LLM.
- Designed retrieval-based pipeline for querying large PDF documents efficiently.

BERT-Based Named Entity Recognition (NER) System

- Fine-tuned DistilBERT for Named Entity Recognition using HuggingFace Transformers.
- Trained on WikiANN dataset to classify entities such as Person, Organization, and Location.
- Implemented token-label alignment to handle subword tokenization.
- Evaluated model using precision, recall, and F1-score.

EDUCATION

B.Tech-CSE

MVGR College of Engineering

📅 2020 - 2023 📍 Vizianagaram

- (Computer Science Engineering)
- Vizianagaram

SKILLS

Programming:

Python, SQL

Machine Learning & Deep Learning:

Supervised Learning, Classification, Model Evaluation, Feature Engineering, Scikit-learn

Natural Language Processing (NLP):

Text Preprocessing, Tokenization, Named Entity Recognition (NER), Transformers (BERT), HuggingFace

Generative AI:

LangChain, LLMs, Prompt Engineering, Embeddings, FAISS

Computer Vision:

OpenCV, Image Processing

Data Analysis & Visualization:

Pandas, NumPy, Power BI

Tools & Frameworks:

FastAPI, Git, Jupyter Notebook

CERTIFICATIONS

Python Programming Certification

Innomatics Research Labs

SQL Database Certification

Innomatics Research Labs

Power BI Certification

Innomatics Research Labs

Exploratory Data Analysis

Innomatics Research Labs
